Category:Information theory Category:CryptographyOh No! You can't start to touch that last, great world-shaking possibility that's been left as an empty shell by now, no?! That is one thing I won't miss. I won't miss, to the very last, the peaceful, straight-talking, happy-go-lucky person who has yet to acknowledge his or her own neurosis. I won't miss the person who will never say anything bad about anyone. I won't miss the person who loves to listen to someone else's woes. I won't miss the person who is never grumpy. I won't miss the person who looks at everything as a joke. I won't miss the person who can't recognize a problem but will jump all over a problem. I won't miss the person who doesn't want to stand out, who doesn't want to draw attention to himself. I won't miss the person who is always on the phone but never has anything to say. I won't miss the person who thinks too much. I won't miss the person who thinks too little. I won't miss the person who doesn't say a word. I won't miss the person who says everything. I won't miss the person who is always well organized. I won't miss the person who is messy. I won't miss the person who goes to bed at 10 o'clock. I won't miss the person who can't go to sleep. I won't miss the person who is absolutely unchangeable. I won't miss the person who can't stand anything but loves to be close to people. I won't miss the person who can't stand to be alone. I won't miss the person who goes to sleep at 9 o'clock. I won't miss the person who can't sleep. I won't miss the person who has no friends. I won't miss the person who has friends. I won't miss the person who never smiles. I won't miss the person who smiles all the time. I won't miss
