Juan Gabriel Vásquez. Imprimir Diseño Ir a la tienda para ver las preciosas ediciones en papel y más ... This paper represents a critical re-examination of the topographical arrangement of bone growths in the temporomandibular joint and its ligamentous coverings. The prevalence of bone growths and the relation of these to the temporal bone and the ligaments are analysed in relation to the knowledge acquired by the author in the anatomy of the joint, in a study of the anatomical formation of the temporomandibular joint. ... This study is concerned with the clinical condition and X-ray manifestations of hyperparathyroidism in chronic renal failure. ... The purpose of this study is to establish the rate of occurrence of thrombosis of the superficial femoral vein (SFV) in a series of consecutive patients. The series was retrospectively reviewed and 91 patients (75 males, 16 females) with a mean age of 54.8 +/- 12.4 years were included in the study. The charts were reviewed for vascular access procedures, the prevalence of thrombosis, the presence of secondary hyperparathyroidism, and the rate of overall venous thromboembolism (VTE) in the study population. ... This study was carried out to determine the efficacy of minimally invasive surgery in the management of thyroid tumours. From 1995 to 1999, 46 cases of thyroid tumours were operated on by minimally invasive surgical procedures. The records of these cases were reviewed for outcome. ... In this study, we wanted to show the feasibility of primary posterior vitrectomy with 20G vitrectomy systems in the management of eyes with intraocular foreign body, vitreous hemorrhage, or rhegmatogenous retinal detachment. ... In this study, a case series of four women with an unsuspected primary carcinoid of the breast was analysed in respect to clinical presentation, cytological and histological diagnosis, treatment, and outcome. ... The object of this study was to evaluate patients with a documented venous thrombosis and to assess the risk factors for recurrence in such patients. A Medline search was performed for reports that contained data on the recurrence of venous thrombosis. These data were used to compile an analysis of the associated risk factors. 2d92ce491b
