7 thoughts on "Introduction To Management Science (12th Edition)" I suggest you try Calibre. It's a lot of work to learn how to use but it's probably worth the effort. You can do things like automate the generation of cover-pages (my cover-page is just a name and the title of the book) and it can add/delete ISBNs for you. I've got two copies of the same book on my Kindle, which means the Kindle can show me the information in one book and the cover-page in another. Additionally, I bought Microsoft's Kindle app. It's not free. It's not required that you use a Kindle with an app (the Kindle app works with pretty much any kindle). It's not required that you use Microsoft's app to buy books. You can buy the books with a web-browser on your computer. It doesn't matter. You can always read the books on the Kindle. (P.S. Calibre is open-source; you can find it on GitHub. The version I used is 2.0, but the process of going from version 2.0 to 3.x isn't much different than going from 1.6 to 2.0).
