and double bass instruments in a variety of timbres. Strings, either solo or ensemble, are some of the most expressive and expressive instruments in the world. Their layered harmonic contours and wide vibrato are perfect for capturing emotion in the music. With their wide range of sounds, it is possible to create many different textures and timbres in a very short time. You can start from scratch with a freshly recorded ensemble, add more string players as needed for a more powerful sound, or record individual parts yourself. The instrument settings in Live can be used as a very effective MIDI controller. This tour supports the sale of the Orchestral Strings library and I would like to encourage everyone to at least purchase a license for the current or previous version of the instrument library. If you have purchased any previous version of this instrument library, you will find yourself in a group of customers who appreciate your support. If you have not purchased a license yet, please buy a license now, as there are new features and improvements in the current version that you should be able to take advantage of. Chaconne Live is a collection of dynamic song patterns for piano and voice, performed live with a variety of percussion instruments. The performer can choose from a variety of voices and percussion instruments, creating a spontaneous performance that allows you to get your ideas out there! This collection includes over 40 drum patterns that can be played by a single performer, or an ensemble of up to 6 performers. Read the documentation, watch a video tutorial, and play a sample live performance to get a feel for the included content. If you have any suggestions or other comments, please drop me a line through the Support form.

A "one-man army" - a powerful collection of kits for drums, bass, guitar and synths. Whether you're into electro, dubstep, progressive or pop, you're sure to find what you're looking for with this studio-ready collection of production tools! The virtual drums category has quite a different look than the rest of the Kontakt Collection. They feature 10 drum kits with special features, and a special library only available to Kontakt. MacOSX Performance is a mini-Piano v2.x plugin that is designed to simulate the performance of the classic Steinway Model P on your Mac, or any other Mac-based instrumentation.
