AutoCAD is used by architects, interior designers, construction and infrastructure engineers, mechanical engineers, civil engineers, industrial design, mechanical design, and for model-based engineering for building construction, vehicle design, interior design, and project development. AutoCAD is also the industry standard for the design and layout of large-scale integrated circuits, such as computers. AutoCAD has over 25 million active users around the world and is available in 75 languages. History AutoCAD is a commercial product developed by Autodesk, Inc. In 1982, its first version was based on Pascal and based on the Apple II computer platform. Apple had sold over 1.5 million Apple II computers during the year. Autodesk released AutoCAD 100 in 1994 for MS-DOS and Windows 3.x. It ran on x86 machines and supported vector graphics in Windows 1.0 and 2.0. Since Windows 95, all versions of AutoCAD and AutoCAD LT support Windows 2000 and newer. In 2003, the first Windows version of AutoCAD LT was released, providing similar functionality as AutoCAD. In the same year, the Graphic Reviewer tool was released to provide additional functionality and to complement the application. Construction and land survey professionals, who are often responsible for the design and documentation of new projects. Scientists, who work on a variety of highly complex projects. AutoCAD is used for: Designing molecular models, which are widely used in chemistry and pharmaceuticals The modeling and simulation of complex scientific phenomena Crystallography, the study of the properties of crystalline solids. Crystallographers use AutoCAD for: Designing crystal structures Solving the crystallographic structure Modeling proteins, which are the building blocks of life, in molecular biology Graphic designers, who work on a variety of print media. Autodesk AutoCAD is the most widely used graphics software for the creation of logos, packaging, exhibition design, posters, photography, animation, display, and other graphic arts. Developers, who write custom applications using the programming language, AutoLISP Engineers who work in many different industries.
