If you are after an all-in-one software solution that will allow you to make free, high quality mobile and fixed line phone calls to anywhere in the world, then ZoiPPE will save you from paying high charges for those calls. ZoiPPE doesn't work by using your PC phone line or a 3rd party telephone line, it uses your internet connection directly to your PC. And ZoiPPE is totally free! So you can make as many calls as you like and you'll never get bill shock. ZoiPPE also makes instant text messaging to your friends and family really simple and fast. And with ZoiPPE Call Divert, you don't have to sit by your PC to make the calls - just divert or forward your calls to your mobile or fixed line number. So you're always in touch with friends and family no matter what. You must install this app before submitting a review. Write a review My review Review from Reviews Errors I searched for days trying to find the setting to disable all adverts but could not. There are still adverts on screen in the background even though the adverts are not visible. I'm not even sure how to activate the ads by setting an ad, there is none in the app. GingerSpice There are ads in the background and the settings are a joke. They should be more informative when asking for permission to read SMS, a message can not be long enough. Error on Call I can not hear the caller even though the audio is turned up. I did not install any VoIP apps on my PC. But it will connect to other users phones, if I attempt to do a call to myself I receive the 'call failed' message. GingerSpice I have a long list of errors and messages that I do not understand. I am using my mobile phone to connect to the free version of ZoiPPE and it connects fine to my mobile provider.
