What's New in the?

-5 Day Text Editor -Real time chat integration to share your work on the go. -Image editor and crop tool. -Calendar & notes sharing integration. -Export to pdf, word, editable CSV, clipboard formats, etc. Business Automation Solutions The process automation tool that lets you not just automate but also have fun doing it. Featuring an array of advanced tools, you can control your business process in multiple ways: manually, automatically or even by making it intelligent. Its visual programming interface means there is no coding or scripting needed. Connect any application, web service or file. If you are fed up with the way your business operates and have an idea of how it should run more smoothly, you should try a process automation tool. In these tools, you can connect your applications, services and files through visual programming. Once this is done, you can control your business process by giving commands, instructions or set actions. Visual Programming Interface Use a visual programming interface (VPI) to control your business process by giving instructions and set

commands. A VPI is a point-and-click interface that is not limited to a single application or environment. It provides a way to write instructions and commands to be executed by your business process. You can use it to connect any application, web service or file. Rapid Debugging Rapid debugging means you do not have to wait for the process to finish to check if your commands have been applied. Instead, you can debug the process by looking at what is happening in real time. You can also track the data at any point and take actions on it. Flex & Flash Player Developer BuilderFlex Builder is an integrated development environment (IDE) for building interactive applications for the web, iOS, Android, or Windows Mobile. It includes tools that allow you to design, build, debug, test, package and deploy applications that combine a rich user experience with an intelligent backend. Flex Builder provides you with a visual tool to create applications quickly and easily. Flex Builder is packed with features including the ability to create and edit XML documents, connect to databases, publish and run web services, and much more. Flash Builder BuilderFlex Builder also includes Flash Builder, a cross-platform IDE that lets you design, create, test and debug Flash applications in one integrated tool. Flash Builder has been designed to simplify Flash development and make it fun again. It includes tools that let you design, build, debug, test, package and deploy applications that combine a rich user experience with an intelligent backend. Flash Builder provides a visual tool for creating rich Flash applications in a matter of minutes. Flash Builder is built on the open source tools and technologies that support the Flash platform, which include Adobe Flash Professional CS5, Flex, and AIR. Flex SDK BuilderFlex Builder includes the Flex SDK, which provides components and tools that extend
