Manage, assign and execute multiple tasks with ease Add a new task Insert subtasks Switch from one task to another Start or pause the timer View the total time spent on a task or all of them Filter tasks by excluding or including them Print, export and save the chart to a file format Clean, intuitive and intuitive interface Makes tasks and their execution easy to monitor Performance is not affected Available for Windows 10, 8, 7, and Vista Requires.NET Framework 4 System Requirements: Operating System: Windows Memory: 2 GB HDD space: 3 GB Size: 8.5 MB BeTask is an application designed for Windows that can help you create and manage to-do lists. The program boasts a wide range of features that will greatly assist you in the process of planning and managing your tasks. Easy-to-use interface This Windows application is designed to be very easy-to-use. For starters, BeTask is very user-friendly. The GUI of the program is highly customizable and has a modern-day layout. The interface is also fairly intuitive, with every function of the program easily understandable. Quick list creation BeTask offers you the possibility to create lists of tasks with ease. With the aid of the drop-down boxes, you can quickly format your list to your liking. For instance, you can name the items or describe them using sub-task functionality. Let's get started! Creating a list of tasks is a breeze. The program has a feature that enables you to instantly create and add new tasks to the list. You can also configure the appearance of the list in terms of its visual appearance and the structure of the items. Due date management BeTask lets you manage your task list by allowing you to add date restrictions for the task. You can define the due date for the task, set it to repeat, or create a task automatically. Setting a due date for the task is a breeze, as the program enables you to specify the target date by simply typing it in the required box. The program is helpful when dealing with tasks that have to be done daily. The regular task scheduler BeTask lets you execute a single task at a specific time by defining a recurrence. For instance, you can configure the task to be executed at 9:00 AM, every Sunday, every first day of the month, every Monday, etc. You can also modify how the

MultiTask
