## What's New In MetalMouse?

"MetalMouse allows you to rapidly and accurately move the mouse pointer from point to point on the screen. MetalMouse offers you several options to choose from. You can configure the application so that you can set the mouse pointer to a certain point on the screen or to a predefined area of the screen. In this case you can have the mouse pointer appear on any position of the screen that you want to. You can also set the cursor position relative to the screen's edges or corners. Optionally, you can synchronize the mouse movements with a video tape. The capture rate can be configured. You can have the mouse pointer jump on keystrokes. With this you can perform many actions more easily than on the traditional mouse. The application allows the mouse pointer to be rotated or zoomed in and out. The application allows the mouse pointer to be positioned with arbitrary coordinates. You can have the mouse pointer move along the screen's edges. You can have the mouse pointer jump on the keys of the keyboard. You can increase the screen's palette. The application provides a choice between soft buttons and those of hard buttons. It is very easy to use and convenient to use." Fully configurable application. Single or multiple instances can be run at the same time. Mouse behavior can be adjusted according to needs. Mouse pointer can be positioned with arbitrary coordinates. Mouse pointer can be rotated. Mouse pointer can be zoomed in and out. Mouse pointer can be positioned at the corners or screen edges. Mouse pointer can be positioned according to mouse input coordinates. Mouse pointer can be positioned according to mouse movement coordinates. Mouse pointer can be positioned according to mouse input or mouse movement coordinates. Mouse pointer can be synchronized with video tape. Mouse pointer can jump on keys. Mouse pointer can be positioned with arbitrary coordinates and have rotation or zoomed in and out. Mouse pointer can be synchronized with a video tape. Mouse pointer can jump on keys and be positioned with arbitrary coordinates and have rotation or zoomed in and out. Mouse pointer can be positioned according to mouse input coordinates and have rotation or zoomed in and out. Mouse pointer can be positioned according to mouse movement coordinates and have rotation or zoomed in and out. Mouse pointer can be positioned according to mouse input or mouse movement coordinates and have rotation or zoomed in and out. Mouse pointer can be positioned with arbitrary coordinates and have rotation or zoomed in and out. Mouse pointer can be positioned according to mouse input or mouse movement coordinates and have rotation or zoomed in and out.
