===== Path  
Length Checker is a small  
Windows application  
whose purpose is to help  
you view a list of all paths  
in a root directory and their  
lengths. The advantages of  
being portable Since this is  
a portable program, it is

---

important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to check out the length of the file paths included in a custom folder on the breeze, without having to

---

go through installation steps. User-friendly layout  
You are welcomed by a well-organized set of functions that allows you to configure the dedicated parameters with minimal effort. Folders can be added into the working environment with the aid of the built-in browse

---

button, so you cannot rely on the drag-and-drop support. Easy-to-trigger actions Path Length Checker gives you the possibility to specify a custom folder, include all files and subdirectories, enter user-defined values for the minimum and maximum path length, as

---

well as replace the root directory in the returned path with a custom location. The utility builds up a list with the items included in the selected folder, and displays information about each one, such as length and path. Additionally, you can view the total number of

---

found paths, and shortest and longest path values, as well as copy paths (with or without lengths) to the clipboard, so you can easily paste the information into other third-party tools.

Bottom line To sum things up, Path Length Checker offers a simple software solution for helping you

---

check out all paths in a root directory and their lengths.

E. Tomitz, my dear friend,  
for his careful review and  
many fine suggestions. #  
Preface Racquetball is an  
activity enjoyed by many  
and has a history that goes  
back to 1887, when it was  
introduced as a sport at the  
Exposition Universelle in  
France. As the sport has  
matured, it has become

---

more complicated as has the equipment, and interest has increased. I have been involved with racquetball for over 30 years. In that time I have seen equipment made from wood, metal, and plastic. Over the years I have observed that manufacturers have occasionally made changes

---

in the design of racquets  
and in the equipment that is  
used

---
