Autosofted Auto Typewriter is an interesting and useful program that allows you to create a new file after each typing period, from which you can then start typing a new paragraph or statement. The program is equipped with a data base that allows you to accumulate every text that you type, along with the timestamp from which it was created, the number of characters and the location on which it was created, to easily create a new document. The latest version also features a formatting function that allows you to modify each typed string to match your exact requirements and preferences, by allowing you to choose one of several available fonts, most of them being popular ones such as Times, Palm, Courier, and so forth. The basic interface of the program is quite simple to use, as you can simply enter the text that you wish to use in the blank space that you will find on the main window. The "File Save" function is located on the bottom of the screen, while the "File" tab will allow you to create a new text file, whenever you wish. Autosofted Auto Typewriter main window Another interesting feature of this program is the "Auto Change" section, which allows you to change the size and type of each string that you type, depending on the letter you use. It even allows you to choose the exact character to be used as a replacement for the typed character, including the number of characters or symbols to be replaced for each typed word. In addition, you will have the means to modify the date and time in which the typing occurred, as well as the day, month, and year of the desired format. Doing so will give you the freedom to change the timestamps on a single screen, allowing you to alter the text added manually to the document you have created or been searching for. The program allows you to control the number of characters and spaces as well as the font, font color, and font size of each typed word and line. Autosofted Auto Typewriter Key Features: * Autosofted Auto Typewriter Registration Code Key Product Free Trial Version Supported Hotlink Direct Download Link: Click Start, Follow Directions and Product Start and Then After Installation Just Run It Automatically updates itself The program is designed to work with both USB and PS/2 keyboards (Not with Mac Extract files with WinRAR Latest Version!
