CDRom-Lock Download For PC (Final 2022)

----- Some programs can force a tray to close on your PC. This happens when you insert a CD / DVD drive, which isn't in use, and they are opened by the PC, closing after a few seconds, independently of the application. This application is a simple utility to prevent this from happening, without affecting the operation of any application. This program works on both CD-ROM and DVD-ROM drives. You can lock CD-ROM drive and DVD-ROM drive individually or both at once. You can perform the following operations: Lock drive - lock the drive, allowing you to perform only one action (open or close) Unlock drive - unlock the drive and allow you to perform multiple actions (open or close). Unlock all drives - unlock all the drives Tray open drive - you can open or close the drive, pressing the eject button. Tray close drive - you can open or close the drive, pressing the eject button. Configuration menu: ----- The configuration menu is located in the 'Configure' menu, on the right-hand side. This menu allows you to choose whether to lock all the drives at Windows startup, to save the drive status in standby and hibernate mode, or to use another drive name in the application. The application automatically detects the connected CD or DVD drive and then places itself in the system tray. It runs in the background, enabling you to lock, unlock, open and close the CD / DVD drive tray with just a click, using the context menu. The main interface is simple and does not provide many configuration options. You can choose the drive you want to control (or select all the CD / DVD drives) and select the action to perform. Locking a drive means that the eject button is blocked and pressing it, either intentionally or by accident has no result, unless the 'Unlock' option is selected again. The application can remember the last drive state and use it at Windows startup, but you can also set it to automatically lock all the connected drives when the computer starts. Furthermore, it can save the drive status while the computer is in standby or hibernate mode and load it again when the system is up and running. Since the application has not received updates recently and is no longer supported by its developer, errors might occur when 77a5ca646e
