Click on "Project Properties" In the left most tab, click on "Build" Check the box next to "Use Autodesk Licence" Click on "OK"◆

## What's New In AutoCAD?

Get the latest info from the Autodesk blog. Interact with your drawings using Point Cloud. Easily add complex 3D features to your drawings to represent information that can't be drawn in your drawings. (video: 1:30 min.) Improve your drawings by adding objects, dimensions, views, annotations, and more. Use the Markup Assist feature to easily create annotations or add dimensions and annotations to your drawings. (video: 2:27 min.) Easily add objects, dimensions, and annotations to drawings from your design software of choice. (video: 1:46 min.) Drawing Elements, Libraries, and Geometries: Add objects to your drawings and incorporate interactivity into your drawings using powerful new objects and shapes. See the new Drawing Elements object, which allows you to add geometric objects and text styles to drawings. Easily add powerful new drawing elements to your drawings. Use the new Drawing Elements object, which lets you import your own drawings into a template. When you import a Drawing Element, it will automatically appear in a drawing's Units and References panel. This object gives you the ability to import symbols or geometric objects into your drawings. (video: 1:24 min.) Use the new Libraries panel to import and manage libraries of files, objects, and symbols. The new Libraries panel is a powerful tool that allows you to manage and share both shape and vector drawing files. (video: 1:43 min.) Organize geometry and manage groups of 3D shapes. Automatically generate geometry and groups of geometry from shapes that you draw, animate, and edit, and use their attributes to create even more complex models. See the new Mesh, Object, and Symbol libraries. (video: 1:40 min.) Make even more complex geometry by adding shapes to a Mesh, Object, or Symbol library. Use the Shape Manager to select geometry and turn it into a mesh, group of 3D shapes, or a symbol. See the new Shape Manager feature. (video: 1:28 min.) Draw using one tool for 2D and 3D. Use the new 2D and 3D tools to quickly switch between creating and editing 2D and 3D objects. (video: 1:28 min.) Speed up your work with the new, improved 3D Drafting feature. Save time by drawing objects and layers in 3D, then exporting them back to 2D
