Serialization and persistence The common data serialization format for AutoCAD is DXF, which is an XML-based format and is supported by AutoLISP. ObjectARX was previously used for data serialization and persistence. Since 2002, Autodesk has deprecated

ObjectARX in favor of the XML format used by AutoCAD's graphical user interface. Printing AutoCAD has its own support for printing, using Autodesk PDF, Adobe PDF and Postscript formats. Although AutoCAD is capable of exporting to PDF, the version of the file is proprietary and does not provide support for annotations, or user-defined colors. From AutoCAD 2009, it is possible to export to PDF, PDF/X, Postscript and Windows Metafile (WMF) formats, with the possibility to annotate PDF, PDF/X and WMF output. Since 2010, AutoCAD has also included printing to Microsoft Windows Printer, which is a Postscript printer driver for Windows NT/2000/XP, Windows 95/98/Me, and Windows 2000 Professional/Server/Data Center, as well as Windows Vista, Windows 7, Windows 8, and Windows 10. AutoCAD 2016 uses it for printing and exporting. Recent releases also include added support for printing to HP Jetdirect, an industry standard network printing protocol, and printing to Epson printers. Rendering With AutoCAD 2012, the render engine changed from using DirectDraw to OpenGL. AutoCAD 2012 and later use OpenGL for rendering. OpenGL is a graphics API for application program interfaces. Since AutoCAD is typically used for 2D, 3D and stereoscopic visualization, the OpenGL API was selected to allow AutoCAD to be used with any OpenGL-compliant rendering software. AutoCAD for Windows is the native version of AutoCAD to include OpenGL support and capability. AutoCAD LT supports OpenGL 2.0 and 3.x. All versions of AutoCAD are now capable of rendering in stereoscopic 3D using OpenGL, as well as multiview capabilities. The rendering engine changed from using VPL to OpenGL in AutoCAD 2014, which is available in 2014, 2015 and later versions of AutoCAD. Integration with third-party applications AutoCAD has been used to develop a number of CAD-specific, AutoCAD-based applications, including TurboCAD and Trel 5b5f913d15

Go to the “Registry” tab Search for the CLSID, usually it’s the “{9FAFCC9C-B6E3-43D4-A4C4-0C22D9B01BB0}”. If you get a miss-match, please check the path of the program which you installed, the program should be located in the same directory of your Autodesk Autocad. Once found, right-click on the item, select “properties” and press “Open with” tab If the program you installed is registered, it will show “Registered”, then press the “OK” button Un-check the “InprocServer32” checkbox and type the same path of the program you registered (eg. “C:\Program Files\Autodesk\Autocad 2017\Autodesk AutoCAD.exe”) Press the “OK” button You are done.

Q: On the difference of two independent random variables Let  $X$  and  $Y$  be independent real random variables. Is it true that  $\mathbb{E}(X) = \mathbb{E}(Y)$ ? A:  $\text{DeclareMathOperator}{E}{E}$  Not necessarily. The basic argument goes like this: since  $X$  and  $Y$  are independent, we can find independent copies  $X_1, \dots, X_n$  and  $Y_1, \dots, Y_m$  of  $X$  and  $Y$ , respectively, such that  $X_i = Y_j$  for  $1 \leq i, j \leq n$ . Taking expectations gives  $\sum_{i=1}^n \mathbb{E}(X_i) = \sum_{i=1}^n \mathbb{E}(Y_i)$ , and hence  $\mathbb{E}(X) = \mathbb{E}(Y)$ .

Q: Is there a fast way to pick  $n$  values from a list of values? Given a list of values: `values = np.random.random_integers(20,40,10)` I want to pick 3 random values without replacement, is
