## How To Find Ps Vita Serial Number Without Sticker !LINK!

Recently I found that the serial number on my vita slim was erased, ... to sell it, gamestop couldn't take it because the sticker was removed somehow. And I really didn't want to return anything since I have no problem using it, but wanted to sell it. So, to save time, I have a question, how can I get the serial number from the console? Is there somewhere on the console or on its packaging a way to find the serial number I need to know? I'm assuming it won't be built into it, so I should be able to get it from another instance, right?
