FinalRecovery For PC

FinalRecovery is a software utility developed specifically to aid individuals in recovering information from the HDD, USB units and SD cards and so on, as well as view details about your PC's health. Hassle-free setup and structured interface The installation process does not last very long, as it does not offer you to download any third-party products. Once you are done with it, you come face to face with a pretty well-organized and clean GUI, as it consists of a menu bar, several buttons and a few panes which enable you to view all detected data, a folder structure and HDD properties. In addition to that, extensive Help contents are supported thus ensuring that all types of users can find their way around it, regardless of their previous experience with the IT world. Types of scans to take advantage of This tool offers two types of scans, so that you can find the files that interest you. To be more precise, you can choose between a standard method and a more advanced one. While the first enables you to find most deleted items, the latter lets you retrieve files and formats from formatted volumes and deleted or lost partitions. View retrieved files and a few details regarding them All recovered items can be viewed in the main window as a folder structure, as well as a list, along with details such as name, extension, status, size and modified date. You can also bring up further properties, view the hex algorithm and save it to the computer, display logs in a separate pane and save them to the HDD in a LOG format. Check your HDD's condition A search function is also integrated and you can create a drive image using a DIF file extension, with just a click of the button. S.M.A.R.T. attributes for your hard disk can be brought up, so that you can easily check the health of your computer. Conclusion To sum up, FinalRecovery is a pretty efficient piece of software, dedicated to both power and novice users, interested in retrieving important data that has been lost or deleted. All jobs are completed in due time, yet you should know that the CPU and memory usage can be quite high at times. There are sufficient options to keep you busy for quite a while and our tests did not register any errors or bugs. FinalRecovery License: Download, install and use FinalRecovery.Uninstall to remove FinalRecovery. 0 comments G G
