

## Nuendo 5.5 Activation Code Keygen ^HOT^

Aug 23, 2010 Dear forum members, I'm happy to announce that Nuendo 5.5 / NEK 5.5 are now available as a free download. Also today I have released (Nuendo 5.5) the first beta version of a brand new Nuendo product called NEK (Never Ending Keygen). FEATURES nuendo 5.5 The new Nuendo interface has been redesigned for an improved user experience. The pre-rendered wave file to wave file converters are now integrated into the audio path of Nuendo. The audio compression algorithm has been upgraded to REDCODE® from REDCODE® 2.0. The "manual" mode of the Noise Reduction is available at the REDCODE® Level 3 for four new reference levels. The external effects can be processed on many more tracks simultaneously than before. The AVERAGE mode of the Noise Reducers can be activated for a more critical noise reduction. The EQ curve is now always available as an in-slide display (previously only on inactive tracks). Additionally, on MIDI tracks the parameters can be edited directly from the "all tracks" preview mode of the MIDI track editor. The decoder (stereo-to-mono converter) is now compatible with surround sound and is available on all tracks. The custom window can be directly edited from the "all tracks" preview mode. Multiple regions can be selected at once and the editor will automatically scroll to show the region on all tracks. The region selector for the effects dialog can be used to quickly set new region for effects and regions that overlap regions of other tracks and tracks from other apps. A new "Save As" dialog has been added to the audio signal inspector. The Wavemeter display mode can be set with the right mouse button to show a graphical waveform. The Wave Zoomer tool has been improved. The new TONEBOOK panel can be used to create, edit and view all stored tone curves. The Editor view has been redesigned and can be easily accessed from the gear menu. Further improvements have been made to the filters. The threshold parameters can be configured in the editor. The average and minimum threshold can be configured in the editor. Custom parameter names can be used to display the parameters easier and more understandable. The
