Credits: - Original Title-5DtoRGB Copyright © 2012 - 2018 by 5DtoRGB team. Q: how to avoid leaving sensitive data in html code I want to use ajax to fill data in my html page. But it's very easy to leave some of my site's data in html code. For example, in a login page, I want to fill data in html code like this `username="123123"` But some hacker could find this username attribute by viewing my source code. For example, hacker could write `username="123123"` and then see that this username attribute in the source code and then insert it in a login form. Is there any good way to hide the data that I want to keep secret? A: You can encrypt it using the following tool: Examples of encrypting your password: password123 is encrypted as 78-8Hb8FHze9gGb0bvwdAs#0!=o0s! and d0gth!ng0g#g076 123123 is encrypted as k6h!!53h!z!!46

System Requirements:

Minimum: OS: Windows 7/Vista/XP, 64-bit. CPU: 1.7 GHz x2 Memory: 1 GB RAM DirectX: Version 9.0
Hard Drive: 1 GB Video Card: Graphics card that supports DirectX 9.0 Recommended: CPU: 2.0 GHz x2
Memory: 2 GB RAM Hard Drive:
