## **iPixSoft GIF To Video Converter Crack Free PC/Windows [Latest] 2022**

iPixSoft GIF to Video Converter is a lightweight software application whose purpose is to help you convert image files to various video formats. It sports a clean and intuitive layout that allows you to carry out most operations with minimum effort. You can upload files into the working environment using the built-in browse function, so you cannot rely on “drag and drop” operations. iPixSoft GIF to Video Converter works with the following file formats: GIF, BMP, PNG, and JPG. Plus, it offers support for batch processing, which means you can add multiple files and process them at the same time. The utility lets you select the saving directory, specify the filename, preview the images, and pick the output format, namely AVI, MP4, WMV, MKV, FLV, MOV, or MPG. What’s more, you are allowed to choose the video quality, save the converted files to the same directory as the source one, and tweak the video parameters in terms of encoder, size, frame rate, bitrate, and background color. Additionally, you can add background music by uploading audio files from your computer (MP3, WAV, WMA), activating the loop function, and selecting the audio encoder, bitrate, sample rate, and channel. Last but not least, you can embed a custom logo by adding an image from the computer (e.g. JPG, BMP, ICO, EMF, PNG, GIF) and choosing its position. During our testing we have noticed that iPixSoft GIF to Video Converter carries out the conversion operation quickly and without errors. It doesn’t eat up a lot of CPU and memory, so the overall performance of the computer is not affected. All in all, iPixSoft GIF to Video Converter offers a handy set of parameters for helping you convert image files to a wide range of video formats. The intuitive layout and rich set of video parameters make it an ideal tool for beginners and professionals alike. But I'm not sure, does that mean the 1.0.1 package is a bug fix to the 1.0.0 version? Oh yeah, good point. I was planning to say that when I clicked "Get Info" on the 1.0.1 version. I just hope there will be an official release soon, even if it's just a bug fix. I will post it here if

### **What's New In iPixSoft GIF To Video Converter?**

## System Requirements For IPixSoft GIF To Video Converter:

8GB RAM NVIDIA GeForce GTX 660 2GB or better Windows 7 DirectX 12 compatible video card DirectX 12 compatible drivers Running on at least a GTX 880 (2GB VRAM) 16GB or more VRAM or 6GB of VRAM and a 6GB card The rule of thumb for VRAM is that it's best to get 2GB per monitor (VRAM) and 1.5GB per video card (VRAM). Graphics are one of the most important parts of the game
