The following are questions that are ethical in nature and should be considered for any ethical questions you have concerning your academic career. When communicating with others, be honest and ethical. Be careful when using computers and the internet. Be careful when using the internet and computers. What does a computer science major need? If you plan on using the computer for school projects, remember the following; -You should submit the work in a timely manner. -You should not use or modify the work of others. -You should not attempt to use an illegal program or tool to do your work. -You should submit and receive a grade for your work. What are the ethical issues in computing? -When you use the internet, you should be careful who you email and what you do online. -A computer may be used in a way you do not want it to be used. -You should be careful what you put on the internet. -You should not modify your school work to include questionable material. -You should not share your school work with others. What are some good rules of thumb for computer use? If you do not know what to do with a computer, don't do it. -It is easy to find something on the internet you really don't want to see. -It is difficult to get the information on the internet that you really want to find. -If something seems too good to be true, it probably is. -Never send money to people you don't know. -Don't use the internet for things other than what it is for. -Try to use the internet in a responsible manner. -If a "computer guy" offers to fix your computer for a fee, he may be asking you for a lot of personal information that you really don't want to give out. Can anyone learn to program? Just because you can write code doesn't mean that you can write an application. There are many steps that one must go through before they can make an application. -Learn the concepts of programming. -Learn the programs that will help you develop an application. -Learn how to use those programs. -Learn how to write applications for your computer. Ethics Beyond High School - Academic Ethics and Internet Use Page 2 What does a computer science major need? A computer science major needs to know everything in order to write a computer application. Here are the subjects 1d6a3396d6
