Category:Windows 8/8.1 License: Free for non-commercial use Visit: [debate over the size of MP's salaries is beginning to heat up again in light of a new report finding that the average MPs' salary in 2016 was £67,465. It comes as figures from the Independent Parliamentary Standards Authority \(IPSA\) show that MPs earn an average of £67,913 in 2016-17 — an increase of more than £9,000 on the previous year — and £47,000 after expenses. The report says that an MP in charge of an area covering about 150,000 people receives an average salary of £48,000. But in the House of Commons financial year \(October 2016 to September 2017\) most MPs received pensions of between £22,500 and £84,000. So-called "London-based" MPs are among the top recipients, with 71 of them getting more than £120,000. There are nearly 200 MPs with pensions of more than £100,000 and just six of them have pensions of less than £37,500. The highest paid female MP in the House of Commons was Karen Buck for Westminster Hall and Strangers' Gallery, who receives £170,731 a year. Dame Louise Mensch also received £170,731 but she is among the top six per cent of recipients in the amount received from the taxpayer. The report has sparked anger with critics criticising how MPs are paid, saying that only 6.5 per cent of the pension is spent on paying the staff that run the House of Commons, meaning that MPs are paid a sum of just over £150 a day. The majority of MPs keep their post-tax salary. The figure of £47,000 is lower than the average salary of a new government minister of £53,747. This includes an £8,300 increase in the MP's salary and £5,000 for housing and £3,000 for the car they use. The average salary for a junior minister is £43,438, including a £7,000 increase on the previous year. Television and radio presenter John McTernan told The Telegraph that MPs should be paid the living wage of £7.40 per hour. Lord Snape, also a former chairman](#)

### Icon Shepherd

Icon Shepherd Free Download is a tiny, unobtrusive app that lives in your computer's taskbar from where it monitors all the position changes of your desktop icons. Before we dive into detail a bit more, please note that the "Auto arrange icons" option must be disabled for the app to carry out its duties. With that out of the way, you can start off by installing the utility via its typical wizard-based installer. Subsequently, you should be able to detect Icon Shepherd's presence in the taskbar, as mentioned before. Save snapshots of your desktop icons and restore their position with just a few clicks The app's functionality could not have been easier. Once your icons are in place, simply click the app's icon and select the "Remember icons now" option from the compact menu to create a new snapshot of your desktop. That said, restoring the position of your desktop icons is just as straightforward. Just click the app's taskbar icon once more, select the "Restore icons" option and choose one of the available snapshots based on their creation date and time. Sleekly integrates with the taskbar and displays native notifications Despite its somewhat unremarkable looks and its overall simplicity, you are bound to discover that this tiny app works very well on later versions of Windows. It's also worth mentioning that it comes with support for native notifications. Speaking of notifications, you will be prompted via simple notifications each time you decide to create a new snapshot or if that it detects no changes since the

last snapshot. Tiny and useful utility that will definitely prove its worth for users with scores of icons on their desktops. All things considered, there's no denying the fact that Icon Shepherd is a useful utility that does its job rather well. The app's easy to install, intuitive to work with, and it's as unobtrusive as a tiny utility of this sort should be. We did, however, find a few little niggles here and there, as the app refused to save snapshots beyond a certain point. A simple restart was necessary to get the app up and running again. No need to search for this utility, as it has been pulled completely from the Windows Store and the reasons are fairly obvious. Microsoft has added some very aggressive filters to the app, and even though that there are no technical issues with the app it seems that is why Microsoft is quietly killing it. The internet is a huge place, and it 09e8f5149f
