The iX3 is more of an evolution of BMW's last concept car from 2016, the iX4. It shares its namesake's wavy shape and has a similar headlamp design, but it features a bezel-free, wraparound windscreen, rounded corners and more traditional roofline. It also shares its ground clearance, which is notably higher than the concept's estimated 120 millimetres (4.7 inches), to a maximum of 170 millimetres (6.5 inches). "The new iX3 concept embodies our high-tech design philosophy and has been crafted specifically for the futuristic BMW i

By combining the scientific theories of tree-of-life theory with recent neurocognitive evidence, I propose a model of the evolution of behavior, specifically, cognitive behavior. I propose that the emergence of complex cognition and thinking is based on the emergence of large-scale hierarchical neural structures, and the development of 'hierarchical neuronal trees' that emerge due to the emergence of social learning. I then propose that emergence of social learning was the driving force in the development of social life and complex thought. These trees then later gave rise to the development of large-scale hierarchical brains, the development of language and the emergence of higher
