called. { "results": [{ "value": "eicarba", "name": "eicarba", "language": "es-ES" }, { "value": "docs", "name": "docs", "language": "en-US" }] }

Q: If $f \in L^1(\Omega)$ and $g \in BV(a,b)$, then $f \in BV(a,b)$? We say that g is of bounded variation if there exists a finite Radon measure μ such that
$$\mu(g, E) = \sup \left\{ \int_E f g : 0 \leq f \leq 1 \right. \\ \left. \text{ and } f \in \mathcal{C}_0^\infty(E) \right\}$$
 where
$$\mathcal{C}_0^\infty(E) = \left\{ f \in \mathcal{C}(E) : f \text{ is smooth outside } \{0\} \right\}$$
. A function f is of bounded variation iff $\|f\|_{BV} < \infty$

A: I have seen this before in some android updates. I bet if you let the game process update it will remove the folder for it. Good luck! UPDATE: After searching up what the folder is, it is a cache of game files for the game. A: I have this folder also and when downloading games using PSn, whenever I try to close the download window after it's done, it shows up with the folder. I just renamed the folder and removed it in PS3. The problem is

the folder is named in the PS3, I'm guessing the program itself is trying to remember that folder, as a folder name. Good luck. The Duchess of Cambridge, who has been leading a high-profile campaign to attract female recruiters and managers to the tech industry, has raised eyebrows after appearing to call for more role models in computer science classes in some UK schools. In a speech at the launch of the "Tech for good" initiative, the Duchess of Cambridge told pupils at Kew school in London that female role models, such as Sir Margaret Rutherford, "whose amazing life story is detailed in the current Aladdin at the Science Museum", should be encouraged in schools. The Duchess pointed to Rutherford's experience as a BBC newsreader and television star as an example to inspire children to follow.

Q: Is the MLE in the limit distribution normal? Suppose we have the following:

$$\begin{array}{l} \frac{1}{n} \sum_{i=1}^n Y_i \xrightarrow{\text{a.s.}} \bar{Y} \text{ and } \\ \frac{1}{n} \sum_{i=1}^n |Y_i - Y_{i-1}| \xrightarrow{\text{a.s.}} \sigma^2 \\ \frac{1}{n} \sum_{i=1}^n Y_i^2 \end{array}$$

$$\hat{\theta}_n = \frac{1}{n} \sum_{i=1}^n Y_i$$
 Is the MLE $\hat{\theta}_n$ in the limit distributed normally? Is it sufficient to approximate the distribution of the MLE as a normal
