Ask HN: What coder/designer/product manager positions do you know of? - nickb If you know of any great positions with good companies, please share here! Here are some favorites: - Design Director - - CEO - ===== jsilence I worked for a small company for a year where the founders had started their own company. The project lead was really

---

brilliant, the founder was coming off of 2 failed startups, he wanted to do it differently. After 6 months of stress, we did start it up and I got to work on my first production software that did some pretty remarkable things in my opinion. I learned a lot, especially on the business side. The founder was barely technical, but his approach to design and development was very pragmatic and the business logic worked very well. After a year, the founders decided they would rather run their own businesses and

---

sold the company to a nice lady.  
----- pajju I found these and thanks  
for posting this thread :) -----  
verdverm We do mostly web  
design/development though there's  
demand for other things as well. We  
also do contract work in java and  
php ----- aashot looks great. Thanks  
for sharing! I am relatively new to  
HN but have browsed through all of  
the comments. My company tries to  
hire freelancers to come work on our  
projects. It is amazing to meet other  
designers and developers. But, still

---

not that many. We are not super expensive, so a high budget for freelance marketplaces probably is a good bet. ----- tptacek For more design roles in NYC, check out the Technical Recruiting team at Freelancer. There's a team in there that almost exclusively fills design roles. They're all in NYC though, and they're the second largest technical recruiter on the site. -----

coupdejarnac Seems you have a very specific company you're looking for. If you can change the

## What's New In?

Computer-based decision support system based on multiple kernel learning applied to prediction of elite soccer players performance. The aim of this research was to study the applicability of the Multi-kernel learning algorithm for modeling and prediction of soccer performance. Using six feature selection algorithms, the bio-functional features and anthropometrical features were retained and the

---

Multiple Kernel Learning algorithm was used for constructing the predictive model of players ability. The results were compared with the performance evaluation proposed by previous studies on soccer players. The results of our study shows that the Multiple Kernel Learning algorithm is a method that could be useful in building performance predictive model, but the results were in agreement with those of the previous studies. Pages Monday, October 2, 2011 Big Day! I'm doing

---

something today that I haven't done since I was 14 years old, and that is moving. I'm packing up everything I own, and moving from Pittsburgh to Buffalo. (I'll be moving to Buffalo this week. I have to be there by the 15th). It's a big day, and it's what I've been planning for, but it's kind of scary. I didn't think I'd be so nervous. I've lived in Pittsburgh for 10 years, and this is going to feel like I've been living in Pittsburgh my whole life. Laundry! I'm hoping to do a lot of the laundry today. I'm only three

---

weeks behind on my bills, but I have to do it all at once. I have to pick up all the stuff I don't want. I need to sell my car, and have it cleaned. I still have 2 million things in my room, and I'm too tired to really go through it all. It's just too big. Like I said, I'm moving to Buffalo, and I'm not moving a whole load of stuff. That would be a mistake. I'm leaving most of my books, CD's, clothing, and other stuff at my brother's house. It's just going to be a load of laundry. Moving feels kind of funny. I've

---

been planning it since April, and now that it's here, I'm surprised and enjoying the process. It will be nice to get away for a while, but I'll miss it here. I feel like Pittsburgh is my home, and Buffalo is my vacation spot. My father says that when I decided to move, I was "running away." I was going to go somewhere where I would

---

**System Requirements:**

**\*\* Important Notice \*\*** The new 2.4.4 SDK features support in the mod: **\*\* MOB\*\*** -- Your bases are now vulnerable if you are offline when you spawn, but -- if you teleport back to the base when you're online, they will be -- invulnerable until the timer expires. **\*\* BOT\*\*** -- Bots now change their path if they teleport out of a base they're -- attacking. They will continue to

---

change their path if the spawning --  
point is different from
