Everything was working fine, then I had to reinstall my OS and when I went to enter the credentials they were empty. When I set them again the user and password are there, but this one doesn't show up in the AccessDB. If I enter in the username and password, it works and my result comes up. I have made sure I have the right permissions and set everything to Auto Execute...I really don't know why it won't show up. Any help would be appreciated. Can you help me search for a book that covers the topology of 2D surfaces/vector spaces? Are there any good books that cover the topics? A: I had the same problem when I was in college. I also tried browsing in a bookstore - they had none that I liked. Then I decided to take a look at the library, and found one set of books by Milnor: Topology from the Differentiable Viewpoint. Topology and Geometry Topology: Dynamical Systems, Cellular Structures, and Vibrations. I just started reading these last two books and they were really hard to read in the beginning. But now I am working through them and they are very easy and rewarding. By the way I recommend also checking out books by Robert Greene on the subject. They are pretty interesting from the street level. MP3 Audio Preview Download Audio about The C9 Collection consists of ten compositions composed by Ferrante, who concentrates his interest on the basic idea of form and structure. The compositions were written in collaboration with a number of freelance musicians from around the world, who each had their own way of structuring the piece. The process of composition was therefore rich in contrasts and over-all themes, giving birth`
