If you like EA SPORTS FIFA games you're going to LOVE this one! The FIFA franchise has been the benchmark for sports simulations for over 25 years. In FIFA 22 it will be even better and make you fall in love with the game all over again. FIFA is fully

customizable and gives you tons of ways to play the game and customize your experience. The title is now fully playable on the Nintendo Wii U™ system and provides richer, more authentic gameplay experiences than ever before. You can play just the game without the extra stuff, or you can play the game alongside other Wii U™ owners by playing both on the GamePad™ or on your TV via the Wii U™ GamePad™ as a second screen. There are a wealth of single player modes, and you can take your friends with you into online

multiplayer, ranked and casual modes. Designed From The Ground Up For The Wii U The Wii U is a new home console, not a re-branded version of the Wii, so FIFA was designed from the ground up for this platform. As a result, it provides the Wii U owners the same game they've come to love with many new features and enhancements. With the addition of the unique, brand new gamePad™ controller, players can take advantage of new features on-the-go, play 2 player simultaneously, or jump into online wireless

multiplayer matches. The game can also be played on the TV with the gamePad™. FIFA 22 supports large HD displays, including the new 32" and 65" LED TVs from Sharp, the 32" and 50" HDTVs from LG and the 42" Bravia™ KDL-42WX800 from Sony. The game will work with the GamePad™ controller, a la carte with only the game and controller on the Wii U™ console, or with the game and a DVD of matches on the GamePad™. The game will also be released this holiday season in a box that is playable on the GamePad™ and has

game features that can be used by itself. We'll also be releasing a free piece of DLC content for free that will turn any standard Wii U disc into an augmented reality experience. Simply place a disc into the Wii U game pad and it will appear as a floating grey box in the game. Then, when a referee blows his whistle to award a penalty or when the player receives a foul, the box will change colors. It will only work in football bc9d6d6daa
