The Physics Engine (FEA) has been improved to simulate ball physics in more realistic ways. For example, while FEA can accurately predict flight time and height after a bounce, it can't predict the exact flight path of the ball. Our new game physics engine simulates the true motion of the ball using a combination of physics, field geometry and motion capture to provide the most realistic and reproducible physics on the PlayStation 4. You'll see the effects of this physics engine on set-pieces and the ability to precisely execute a tackle. Integrated Performance Assessments (IPAs), including sprint speed and acceleration, have been adjusted to accurately reflect real-life performance. And aiming has been tweaked to give more consistent shots during shot selection. For the first time in a FIFA game, goalkeeper agility and anticipation are presented in the goalkeeping animation system. The goalkeeper will also have more freedom to react to the ball, and will more accurately line up his or her shot. Players can now make more efficient use of the aerial duel and corner. Team Hints provides a subtle, persistent visual and audio prompt for players to connect to their teammates in the heat of the moment. This allows players to more consistently follow the developments of the ball, and connect with their teammates through tactical play. Meshes have been intelligently designed to ensure that the ball moves smoothly through the environment when taking a shot. Volumes that cannot be accurately represented by polygons, such as the interior of goalposts, have been integrated into the game, allowing the player to feel the presence of the ball where they never would've in the past. Key Features: Let's Play Mode: Gamers can now play the game from beginning to end in the Let's Play View. The intuitive controller setup will enable you to manage all the various settings and view important statistics alongside a player's rating and selected attributes. The "Playing Your Way" view shows off all the moves you've unlocked so far. (Warning: this view contains spoilers for the game!) New FIFA Ultimate Team: Introduced in FIFA 19, fans will be able to assemble their Ultimate Team online through the new scouting system and a new team builder. You can now search for players based on attributes and edit your team in real-time and see if your new move met their criteria. FIFA Ultimate Team Rivals mode brings
