Hldtst dvdram hl-dt-st-dvdram-gt30n-ata-device-driver-for-windows-10-32-bit/.Q: Set default scope for all scopes in Grails 3.0.4 I would like to set a default scope for all generated scopes in my Grails 3.0.4 app. For example I created the following data object: package com.myapp.domain import groovy.transform.ToString import javax.persistence.Entity import javax.persistence.GeneratedValue import javax.persistence.Id @Entity class MyModel { String modelName String dataType String preTag String dateFormat @Id @GeneratedValue Long id static constraints = { } static mapping = { table "my\_model" version false } String toString() { modelName } } When I run the app, the following generated getters and setters are inserted: getModelName() { MyModel.findByModelName(this.modelName) } void setModelName(String modelName) { MyModel.uniqueIndex().executeUpdate("UPDATE my\_model SET model\_name =? WHERE model\_name =?", [modelName, this.modelName]) this.modelName = modelName } I would like to set the default scope of the modelName property to be the "default" scope (that is the defaultScope). I tried setting the default scope for the data class directly but it doesn't seem to work. Can anyone suggest how to set the default scope for all the generated getters and set 648931e174
