Think before you'shop: Dummies cautions readers that the only way to maximize your productivity is to produce the best work you can. Using Photoshop will make the difference between capturing an image you're pleased with and turning out a blurry picture of a cat. Getting Creative with Photoshop Plug-ins Image-editing tools can become overly complex, so you can always find something in the Photoshop workflow to save you time or get creative. Photoshop's Photoshop Plug-ins (Photoshop extensions) are little wizards that help you automate repetitive tasks, such as applying filters, adjusting text, sharpening an image, enhancing tonal range, and adding layer styles and drawing tools. Photoshop has a large number of plug-ins, which can make the conversion process between versions complicated. The following sections explain

---

the Photoshop plug-ins that can help you capture, manipulate, and project images.

**Basic Photoshop plug-ins** Basically, the free Photoshop plug-ins available for you to use are limited to such tools as a brush, file browser, eyedropper, lasso, magic wand, photo montage, retouching tool, selection tool, straightening tool, transform tool, and vector image tools. As a beginner, you're more likely to use plug-ins for their secondary purposes, such as creating a background, creating text, or cropping an image.

**Apply a filter** If you're going to share an image via a website or e-mail, you can add a filter to create a more unique-looking image. To apply a filter:

1. Choose Filter⇒Filter Gallery (or press Ctrl+F) and click the Filter button in the upper-right corner of the Photoshop window to open the Filter dialog box. Alternatively, choose Window⇒Filter Gallery (or press F5).
2. In the Filter Gallery, choose an appropriate filter from the Filter drop-down menu.

Photoshop has several good filter libraries

---

built into its graphic suite. For example, for holiday photo editing, go to Filter⇒Blend-Fx⇒Photoshop Elements 2011, or by pressing F6. You'll find a library of built-in filters, and you can apply any of them to create something visually unique and festive. You can also create your own custom filters. 3. Click OK. In your photo, a gradient-based filter is applied. Note that

The present invention relates to a new and distinct cultivar of the *Elaeagnus* genus and botanically known as *Elaeagnus macrophylla* × *E. pungens*, hereinafter referred to by the name ‘Wesjolodje’. The new *Elaeagnus* cultivar is a product of a planned breeding program conducted by the Inventor in Hikone, Shiga, Japan. The objective of the breeding program is to create new *Elaeagnus* cultivars with uniform plant habit, flowers with desirable inflorescence form and floret color, and good postproduction longevity. The new *Elaeagnus* cultivar is a naturally-occurring whole plant mutation of the *Elaeagnus macrophylla* × *E. pungens* cultivar Majykin, disclosed in U.S. Plant Pat. No. 16,110. The new *Elaeagnus* cultivar was discovered and selected by the Inventor in April, 2003 as a single flowering plant within a population of plants of ‘Majykin’ in a

controlled environment in Hikone, Shiga, Japan. The selection of this plant was based on its uniform plant habit and desirable inflorescence form and floret colors. Asexual reproduction of the new cultivar by terminal cuttings in a controlled environment in Hikone, Shiga, Japan since June, 2003 has shown that the unique features of this new *Elaeagnus* cultivar are stable and reproduced true to type in successive generations.Q:

So finally after so many leaks, we have the official Nissan Juke Nismo R-Spec video. The R-Spec Juke will make its public debut next week at the Goodwood Festival of Speed, which is always a fun event full of quirky cars and bizarre tires. The Juke Nismo R-Spec is an elaborate way to pay homage to the upcoming Juke Nismo S-tune, the Nissan GT-R based compact sportscar. Nissan made the Nismo version of the Juke, so it's not exactly a surprise that they're making one with the GT-R. But it's not a GT-R GT-R, it's a R-Spec Nismo GT-R that's based on the Juke. The Juke is fairly fresh, so the changes that Nissan's made to the R-Spec Nismo Juke are fairly subtle. It has a new front bumper, rear diffuser, diffuser vents, diffuser pinstripes, fender add-ons, side skirts, roof add-ons, and a diffuser bootlid. It also has an extra large rear spoiler and side skirts. You can also see that the R-Spec Nismo Juke has some extra power under the hood, courtesy of

---

a 3.8-liter inline 6 cylinder engine that cranks out a healthy 300 horsepower. The R-Spec Nismo Juke is set to go on sale starting in August and has a price tag of \$39,595 in the United States.

July 2017 A reader recently asked about how to print out a copy of a text file including multiple pages. One way to do this would be to use the command-line tool `xrefread`. You can read more about this at the following links. You can also use `FDRead`, which is a front-end GUI interface to `xrefread`. In this post, you will see how to use `FDRead` to process MS Office Documents (doc, xls, ppt) using `FDRead`'s `Compsspage` feature. `FDRead` supports PDF, FPDF, XPD and XFPDF as output file formats. I am using `FDRead 6.1.1` to create XFPDF outputs from both ppt and doc files. The results are highly similar to those of the command-line tool `xrefread`. I am using `FDRead`
