Malicious applications are not the only threats to your computer. Removing programs often leaves files that are no longer of any use or invalid registries. SmartPCFix 2022 Crack is a lightweight and powerful software utility meant to scan your computer for errors and attempt to fix them in order to boost your machine's performance. Search in multiple categories The overall design of the application is kept close to a minimum to ensure your computer gets cleaned as fast as possible. As soon as the main window is brought up you gain access to various categories to select for the scan process, amongst which you find registry, privacy or trace cleaner. Schedule scan processes with an automatic cleaner Browsing through the application's settings menu, you inevitably come across the "Automatic Clean" feature. It gives you the possibility to schedule when your computer is scanned for issues and can be set at startup, when the system is idle so it

does not keep you from work, or at a specified time period. Add exceptions and manage restore points Another useful feature of the application is the possibility to add exceptions to either of the categories. You can set a keyword to exclude from search, files or folders, as well as memory processes, to speed up scanning and cleaning your computer. Additionally, you are given access to a function that lets you create restore points in case certain important files were accidentally removed while trying to fix your machine. In conclusion To sum it up, SmartPCFix Crack Free Download is a handy utility to keep on your hard disk drive. It does not take up much space nor does it crave for system resources. What's New in the?

Whether you are a pro or a novice user, computer repair is probably on your list of things to do. When you need to have your personal computer repaired or just need general help, its a good idea to learn how to repair it yourself to save the most money. If you are new to the field, this article will help. What do you need? This article will focus on a basic PC so we will assume that you have access to the following things: A computer An

internet connection Something to document your repairs on (an old phone or piece of paper will do) A way to test the computer if you are performing a service How do you test your computer? This will be a topic for a whole article in itself but you will need the following things: A PC with Windows and a method to burn a disc (if you don't have Windows, you might be able to use a mac) A DVD burner or a PC and a USB stick A USB thumb drive (approximately the size of a CD) A standard keyboard and mouse Firewall disabled on both machines Simple to understand user instruction (many computer repair sites do not supply this) If your computer is running Windows XP or Vista, use the Windows Easy Repair CD If your computer is running Windows 7, use the Windows 7 Repair CD If your computer is a Mac, you will need an Apple CD. If you don't have one, it is usually available on the local Apple Store, and if you don't have access to an Apple Store, you will probably have to buy it online. PCs and computers, they are so complicated. You should know that before you even start

searching for a repair manual or buying a repair disc. If you have time, I recommend looking for a repair disc for your operating system. It will be mostly for Windows users but a few mac repair discs are available as well. My good friend Allen, who has been repairing computers for over 16 years, suggested I write this article and he would be willing to talk to me if I need help, he's been very helpful to me when I had troubles in the past. In addition to our good friend Allen, the staff at FixYa are also willing to help. You can find them on the "Contact Us" page or you can email them at service@fixya.com. The reason that they are offering
