as for the previous generation of wi-fi devices, wi-fi is protected by wpa and wpa2, there are two ways to solve the problem: only use the router login page or use the user interface to log in. generally, the user interface is more convenient than the router login page, so we recommend you to use the user interface to login to the router. highlights: the results show statistically significant differences in frequency two types of alarm before and after the intervention, the frequency two monitoring parameters, customized monitor settings for patients and people who respond to alarms. the percent of effective interventions for all parameters was significantly greater after the intervention (46.9%) than before (38.9%). abstract: this quasi-experimental study evaluated the effectiveness of the introduction of a manual for alarm management and control in the icu of a hospital in southeastern iran. the intervention was a 4-hour workshop was on topics related to the adverse effects of alarms, standardization of ecg, oxygen saturation and blood pressure monitoring systems, and the use of ventilators and infusion pumps. data were collected through 200 hours of observation of 60 icu nurses (100 hours' pre-intervention and 100 hours' post-intervention). response time, type of response, customization of alarm settings for each patient, the person responding to an alarm, and the cause of the alarm were analyzed. alarms were classified into three types: false, true and technical. results: we demonstrated statistically significant differences in the frequency of two types of alarm before and after the intervention in the icu, the frequency of two parameters of monitoring, customized monitor settings for patients and people who responded to the alarms. the percent of effective interventions for all parameters was significantly higher after the intervention (46.9%) than before (38.9%). 5ec8ef588b
